STATEMENT OF OBJECTS AND REASONS

The Land Acquisition Act, 1894 is the general law relating to acquisition of land for public purposes and also for companies and for determining the amount of compensation to be made on account of such acquisition. The provisions of the said Act have been found to be inadequate in addressing certain issues related to the exercise of the statutory powers of the State for involuntary acquisition of private land and property. The Act does not address the issues of rehabilitation and resettlement to the affected persons and their families.

2. The definition of the expression "public purpose" as given in the Act is very wide. It has, therefore, become necessary to re-define it so as to restrict its scope for acquisition of land for strategic purposes vital to the State, and for infrastructure projects where the benefits accrue to the general public. The provisions of the Act are also used for acquiring private lands for companies. This frequently raises a question mark on the desirability of such State intervention when land could be arranged by the company through private negotiations on a "willing seller-willing buyer" basis, which could be seen to be a more fair arrangement from the point of view of the land owner. In order to streamline the provisions of the Act causing less hardships to the owners of the land and other persons dependent upon such land, it is proposed repeal the Land Acquisition Act, 1894 and to replace it with adequate provisions for rehabilitation and resettlement for the affected persons and their families.

3. There have been multiple amendments to the Land Acquisition Act, 1894 not only by the Central Government but by the State Governments as well. Further, there has been heightened public concern on land acquisition, especially multi-cropped irrigated land and there is no central law to adequately deal with the issues of rehabilitation and resettlement of displaced persons. As land acquisition and rehabilitation and resettlement need to be seen as two sides of the same coin, a single integrated law to deal with the issues of land acquisition and rehabilitation and resettlement has become necessary. Hence the proposed legislation proposes to address concerns of farmers and those whose livelihoods are dependent on the land being acquired, while at the same time facilitating land acquisition for industrialization, infrastructure and urbanization projects in a timely and transparent manner.

4. Earlier, the Land Acquisition (Amendment) Bill, 2007 and Rehabilitation and Resettlement Bill, 2007 were introduced in the Lok Sabha on 6th December, 2007 and were referred to the Parliamentary Standing Committee on Rural Development for Examination and Report. The Standing Committee presented its reports (the 39th and 40th Reports) to the Lok Sabha on 21st October, 2008 and laid the same in the Rajya Sabha on the same day. Based on the recommendations of the Standing Committee and as a consequence thereof, official amendments to the Bills were proposed. The Bills, alongwith the official amendments, were passed by the Lok Sabha on 25th February, 2009, but the same lapsed with the dissolution of the 14th Lok Sabha.

5. It is now proposed to have a unified legislation dealing with acquisition of land, provide for just and fair compensation and make adequate provisions for rehabilitation and resettlement mechanism for the affected persons and their families. The Bill thus provides for repealing and replacing the Land Acquisition Act, 1894 with broad provisions for adequate rehabilitation and resettlement mechanism for the project affected persons and their families.

6. Provision of public facilities or infrastructure often requires the exercise of powers by the State for acquisition of private property leading to displacement of people, depriving them of their land, livelihood and shelter, restricting their access to traditional resource base and uprooting them from their socio-cultural environment. These have traumatic, psychological and socio-cultural consequences on the affected population which call for protecting their rights, particularly in case of the weaker sections of the society including members of the Scheduled Castes (SCs), the Scheduled Tribes (STs), marginal farmers and their families.

7. There is an imperative need to recognise rehabilitation and resettlement issues as intrinsic to the development process formulated with the active participation of affected persons and families. Additional benefits beyond monetary compensation have to be provided to families affected adversely by involuntary displacement. The plight of those who do not have rights over the land on which they are critically dependent for their subsistence is even worse. This calls for a broader concerted effort on the part of the planners to include in the displacement, rehabilitation and resettlement process framework, not only for those who directly lose their land and other assets but also for all those who are affected by such acquisition. The displacement process often poses problems that make it difficult for the affected persons to continue their traditional livelihood activities after resettlement. This requires a careful assessment of the economic disadvantages and the social impact arising out of displacement. There must also be holistic effort aimed at improving the all-round living standards of the affected persons and families.

8. A National Policy on Resettlement and Rehabilitation for Project Affected Families was formulated in 2003, which came into force with effect from February, 2004. Experience gained in implementation of this policy indicates that there are many issues addressed by the policy which need to be reviewed. There should be a clear perception, through a careful quantification of the costs and benefits that will accrue to society at large, of the desirability and justifiability of each project. The adverse impact on affected families-economic, environmental, social and cultural-must be assessed in participatory and transparent manner. A national rehabilitation and resettlement framework thus needs to apply to all projects where involuntary displacement takes place.

9. The National Rehabilitation and Resettlement Policy, 2007 has been formulated on these lines to replace the National Policy on Resettlement and Rehabilitation for Project Affected Families, 2003. The new policy has been notified in the Official Gazette and has become operative with effect from the 31st October, 2007. Many State Governments have their own Rehabilitation and Resettlement Policies. Many Public Sector Undertakings or agencies also have their own policies in this regard.

10. The law would apply when Government acquires land for its own use, hold and control, or with the ultimate purpose to transfer it for the use of private companies for stated public purpose or for immediate and declared use by private companies for public purpose. Only rehabilitation and resettlement provisions will apply when private companies buy land for a project, more than 100 acres in rural areas, or more than 50 acres in urban areas. The land acquisition provisions would apply to the area to be acquired but the rehabilitation and resettlement provisions will apply to the entire project area even when private company approaches Government for partial acquisition for public purpose.

11. "Public purpose" has been comprehensively defined, so that Government intervention in acquisition is limited to defence, certain development projects only. It has also been ensured that consent of at least 80 per cent. of the project affected families is to be obtained through a prior informed process. Acquisition under urgency clause has also been limited for the purposes of national defence, security purposes and Rehabilitation and Resettlement needs in the event of emergencies or natural calamities only.

12. To ensure food security, multi-crop irrigated land shall be acquired only as a last resort measure. An equivalent area of culturable wasteland shall be developed, if multi-crop land is acquired. In districts where net sown area is less than 50 per cent. of total geographical area, no more than 10 per cent. of the net sown area of the district will be acquired.

13. To ensure comprehensive compensation package for the land owners a scientific method for calculation of the market value of the land has been proposed. Market value calculated will be multiplied by a factor of two in the rural areas. Solatium will also be increased upto 100 per cent. of the total compensation. Where land is acquired for urbanization, 20 per cent. of the developed land will be offered to the affected land owners.

14. Comprehensive rehabilitation and resettlement package for land owners including subsistence allowance, jobs, house, one acre of land in cases of irrigation projects, transportation allowance and resettlement allowance is proposed.

15. Comprehensive rehabilitation and resettlement package for livelihood losers including subsistence allowance, jobs, house, transportation allowance and resettlement allowance is proposed.

16. Special provisions for Scheduled Castes and the Scheduled Tribes have been envisaged by providing additional benefits of 2.5 acres of land or extent of land lost to each affected family; one time financial assistance of Rs. 50,000/-; twenty-five per cent. additional rehabilitation and resettlement benefits for the families settled outside the district; free land for community and social gathering and continuation of reservation in the resettlement area, etc.

17. Twenty-five infrastructural amenities are proposed to be provided in the resettlement area including schools and play grounds, health centres, roads and electric connections, assured sources of safe drinking water, Panchayat Ghars, Anganwadis, places of worship, burial and cremation grounds, village level post offices, fair price shops and seed-cum-fertilizers storage facilities.

18. The benefits under the new law would be available in all the cases of land acquisition under the Land Acquisition Act, 1894 where award has not been made or possession of land has not been taken.

19. Land that is not used within ten years in accordance with the purposes, for which it was acquired, shall be transferred to the State Government's Land Bank. Upon every transfer of land without development, twenty per cent. of the appreciated land value shall be shared with the original land owners.

20. The provisions of the Bill have been made fully compliant with other laws such as the Panchayats (Extension to the Scheduled Areas) Act, 1996; the Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 and Land Transfer Regulations in Fifth Scheduled Areas.

21. Stringent and comprehensive penalties both for the companies and Government in cases of false information, *mala fide* action and contravention of the provisions of the propose legislation have been provided.

22. Certain Central Acts dealing with the land acquisition have been enlisted in the Bill. The provisions of the Bill are in addition to and not in derogation of these Acts. The provisions of this Act can be applied to these existing enactments by a notification of the Central Government.

23. The Bill also provides for the basic minimum requirements that all projects leading to displacement must address. It contains a saving clause to enable the State Governments, to continue to provide or put in place greater benefit levels than those prescribed under the Bill.

24. The Bill would provide for the basic minimum that all projects leading to displacement must address. A Social Impact Assessment (SIA) of proposals leading to displacement of people through a participatory, informed and transparent process

involving all stake-holders, including the affected persons will be necessary before these are acted upon. The rehabilitation process would augment income levels and enrich quality of life of the displaced persons, covering rebuilding socio-cultural relationships, capacity building and provision of public health and community services. Adequate safeguards have been proposed for protecting rights of vulnerable sections of the displaced persons.

25. The Bill seeks to achieve the above objects. The notes on clauses explain the various provisions contained in the Bill.
